

K-Love is serving my community as a non-commercial radio station with christian broadcasting that we support and listen to exclusively. I believe that our local community would suffer greatly from the loss of K-Love's excellent programing selections if LPFM broadcasters are authorized by the FCC. The family friendly programming of K-Love is not available any where else on the FM dial here in the Phoenix Metro area. I do not believe that the federal government should make local radio a part of their concern. Please worry about larger national and international issues.
